

Private AI for real work. People in command. Agents at work.

iSol puts AI to work inside your company: from the team chat to the whole process, with governance, human approval and data inside the perimeter you define.

Your work

agents on the repetitive, people on judgment

Your data

on iSol Private Cloud or On Site

Your intelligence

every agent has a role, a manager and limits

1 · **START FAST** teams and developers, buy directly

iSol Workspace

Your company AI chat, in an instance of its own, with admin and files ready in Excel, Word and PowerPoint.

from **US\$ 7** per seat/month

14-day free trial · no setup · no lock-in

iSol API

More than tokens: private AI infrastructure, one price for input and output, you choose where it runs. OpenAI standard.

from **US\$ 99** /month · 3M tokens

7-day trial on request · cap per key

iSol Media

AI image and video. The team asks in the Workspace chat, the product generates through the API.

from **US\$ 29** per organization/month

not priced per user · one-click activation

2 · **RUN PROCESSES** from task to operation, one step at a time

TASK

iSol Assist

Digital Intern

does bounded tasks and asks for human review

activation + monthly fee

RESPONSIBILITY

iSol Expert

Specialist

owns a function, with a human owner and KPIs

activation + role + usage

PROCESS

iSol Flow

People + AI

steps, human and digital roles, approvals and KPI

project + operation

OPERATION

iSol Squad AI

AI team

agents and people running the whole process

fixed project + support

MANAGEMENT

iSol Command

Digital Office

queues, approvals, evidence and value on one screen

modules and users

Nobody buys it all at once: the diagnosis shows where to start, and scope and investment come closed in the proposal.

3 · ENTRY PROGRAM

iSol Cases

Your first digital employee in production, on a real process of your company.

US\$ 2,000 /month × 12

- ✓ implementation co-invested by iSol
- ✓ in production by month 2 to 3
- ✓ delivery guarantee and penalty-free exit at Gate 1

WHERE THE DIGITAL EMPLOYEE WORKS

Microsoft 365 Google Workspace Web · iSol Command

iSol Desk · in pilot

For companies with at least US\$ 1 million a year in revenue · 10 slots

WHERE THE AI RUNS

iSol Private Cloud

our infrastructure, NVIDIA GPUs in our own data centers

iSol On Site

a dedicated node in your rack, same endpoint; loan or purchase

In both, the engine is iSol 4.9: one model with routing that picks the right path for each request.

HOW WE IMPLEMENT

Discover → Design → Build → Adopt → Operate → Improve

iSol Method + iSol Change: adoption led by Prosci®-certified practitioners.

Member of the NVIDIA Inception program

THE CLIENT SAYS... YOU OFFER

"We want AI for the team without exposing our data." → **Workspace**

"Our system needs AI inside." → **API**

"We need images and videos." → **Media**

"This task eats hours every week." → **Assist**

"Nobody owns this function." → **Expert**

"The whole process goes from hand to hand." → **Flow or Squad AI**

"We use AI, but cannot see what it does." → **Command**

"The data cannot leave the company." → **On Site**

"I want to start with a delivery guarantee." → **iSol Cases**

THE PROOF

US\$ 10M

processed

25,870

ERP entries

6 + 1

agents and 1 person

Real finance case in the US (QuickBooks Desktop), through Aug 2026, client name withheld. Proof of execution, not a promise of identical results. TOTVS in acceptance testing.

AUTONOMY UNDER CONTROL

N0	N1	N2	N3	N4
Observes	Analyzes	Prepares	Runs routine	Critical, with approval

Approvals and evidence are logged. AI budget alerts at 50, 75, 90 and 100%. Details in the Trust Center.

WHO WE ARE

A union of 4Clouders (Brazil) and iSolutions CloudX (USA). Our own engineering, from the data center to your building.

Tiago Mafra

Founder and Technical Lead, creator of iSol 4.9
Deerfield Beach, FL · Ipatinga, MG · São Paulo, SP

Ricardo Barbosa

Commercial Lead, Microsoft MVP in Security
